

9000/9512 Date Change Instructions

The 9212/9512 may also appear black with a beige cover. Both versions will follow the same procedure in changing the year. This meter is also a part of the 9000 Mailing System.

Lift the front cover (as in the picture to the left) to access the print wheels. You do not need to turn the power off. Once the cover is raised, the meter will be unable to print.

Using the Ad-Plate tool, a pen or a small screwdriver, turn the year column towards yourself to select "01". The wheels may be a little stiff from being stationary all year.
