along with Charnstrom's color-coded totes for a more rapid department sort.

One-inch tube frame racks built to accommodate USPS size totes and many other size totes, available exclusively from Charnstrom. Tote racks are available in two sizes; 34"W unit holds 6 USPS standard size totes, and 50 1/4"W unit hold 9 USPS standard size totes. Both units are 59 1/2"H x 18"D. Bolt-together rugged one-inch chrome steel frames are lightweight and easy to move.

For more information, call 800-328-2962, or circle Charnstrom on the Reader Service Card.

Neopost Helps Lance Armstrong Foundation

HAYWARD, CA -- As the Lance Armstrong Foundation (LAF) has increased its educational and fundraising outreach, so too have its mailings.

When the foundation was in need of a new mailing system that could better handle the increasing volume of mail, Neopost donated its IJ high-volume digital mailing system.

Neopost's IJ mailing machine was designed specifically to manage the flow of everyday mail, including high-volume mailings like those sent out by the LAF.

The high-speed system can process up to 10,800 pieces of mail per hour, as well as handle envelopes of various size and thickness, ensuring maximum efficiency.

Neopost's digital mailing machine supports the functions of the entire LAF organization, including processing packages for its largest fundraising operation, the Peloton Project.

In 2004, members of the Peloton Project collected more than \$5.5 million in donations to help the LAF keep cancer survivors living strong. To learn more about Neopost, call 888-NEOPOST.

Stamp Affixer Converts Mailing Machines

MINNEAPOLIS, MN -- The Postmatic Model 6000 Stamp Affixer converts a Pitney Bowes mailing machine into a high-speed, high-production stamp affixer. Removing the meter and inking system, and then placing the Model 6000 in the meter's place allows users to operate the system in-line with inserting equipment or off-line as a separate operation.

The Model 6000 applies stamps as fast as the Pitney Bowes will cycle, up to 15,000 pieces per hour. It will apply any denomination of stamps available from the USPS in coils of 500, 3,000 or 10,000. Models are available to apply the water-activated glue stamps or the self-adhesive, pressure-sensitive stamps.

For more information, call 888-784-6046, or circle Postmatic on the Reader Service Card.
